SUPREME Trunnion ball valve

Macro [Ball valves](#)

Category [SUPREME Trunnion](#)

benefits

DN ≤ 100 SIZE ≤ 4" – ANSI 150-300

1. Antistatic device ((electrical continuity between ball, stem and body)

Static electricity is avoided which can cause sparks and fire in an inflammable/explosive environment
Contact safety throughout the entire life of the valve

2. Double antifriction washer

Less Break Away Torque is granted
Less wear comparing with the execution with the single washer

3. "V" seals pack; 3 seals + o-ring

It ensures a perfect tightness even after a high number of cycles

4. Spring washer on the shaft seal

Guarantee of the recovery of the gap due to the wear caused by the rotational movement of the shaft avoiding leakage towards the outside part.
Allow to maintain energized the "chevron" seals (V), thus avoiding any leakage to the outside, against huge temperature excursions

5. Stretch Graphite seal

Tightness towards outside is granted, independently by the thermal excursions to which the valve is subjected

Greater precision in the alignment of axes due to a unique positioning in the process machining from raw material to finished valve

Longer lifetime of the valve
Less break away torque

Valves in carbon steel made with certified material - NACE as standard

Greater corrosion resistance
Greater ductility of the material

100% in- house manufacturing process technology

Maximum control and accuracy in all the stages of the manufacturing process
Flexibility in supply quickly special executions requested by customers

"Fire safe" Certificate

Guarantees the tightness of the valve also in case of fire

ATEX Certificate

Installation is possible in a potential explosive environment

TA LUFT fugitive emission Certificate

High level of safety of the tightness towards the outside is granted

PED Certificate

Full compliance with European Safety Standards for Pressure Equipment

UP to SIL 3 certified

Guarantee of the high level of functional safety

DN ≤ 100 SIZE ≤ 4" – ANSI ≥ 600

1. Double antifriction washer

Less Break Away Torque is granted

Less wear comparing with the execution with the single washer

2. Two ball guiding bushings

Less valve torque

Antistatic device ((electrical continuity between ball, stem and body)

Static electricity is avoided which can cause sparks and fire in an inflammable/explosive environment

Contact safety throughout the entire life of the valve

Stretch Graphite seal

Tightness towards outside is granted, independently by the thermal excursions to which the valve is subjected

Valves in carbon steel made with certified material - NACE as standard

Greater corrosion resistance

Greater ductility of the material

"Fire safe" Certificate

Guarantees the tightness of the valve also in case of fire

ATEX Certificate

Installation is possible in a potential explosive environment

PED Certificate

Full compliance with European Safety Standards for Pressure Equipment

UP to SIL 3 certified

Guarantee of the high level of functional safety

DN ≥ 150 SIZE ≥ 6"

FUGITIVE EMISSION Certificate

High level of safety of the tightness towards the outside is granted

features

STANDARD EXECUTION

- Two or three pieces body
- Resilient seat
- Automatic body cavity relief
- Double Block & Bleed
- Pressure class: ANSI 150÷ANSI 2500
- Applications: chemical and petrochemical plants, oil & gas production, power plants, other process industry applications, liquid, gas and steam, hydrocarbons
- Anti blow out stem

SPECIAL FEATURES ON REQUEST

- Double piston effect
- Material and special execution according to Customer Specifications
- ATEX marking and certificate ON REQUEST

CERTIFICATIONS

- In compliance with European Directive 2014/68/EU PED.
- In compliance with European Directive 2014/34/EU ATEX (ATEX certificate ON REQUEST).
- Safety integrity level up to SIL 3 according to IEC 61508.
- FIRE SAFE EN ISO 10497- API607.
- Fugitive Emission UNI EN ISO 15848.

STANDARD DESIGN

- ASME B16.34
- End connections: ASME B16.5 (RF-RTJ), ASME B16.25 (BW)
- Face to face: ASME B16.10
- Drives mounting flange: ISO5211
- Design API 6D on request.
