## HERCULES for non self-lubricating media carbon steel ball valve

Macro Ball valves

Category HERCULES

Subcategory HERCULES for non self-lubricating media

benefits

**1. Seat in "LUBROSEAT"**

Acetal resin compound containing self-lubricating additives.  
Ideal for non-lubricating fluids.  
High resistance to stress.

**2. Stainless steel ball, coated with 40µm Hard Chrome**

Longer seal life due to the low wear of the ball

**3. "POWERAMMIDE"<sup>™</sup> stem bush**

It grants a perfect alignment of the shaft on the body and prevents oscillations with high pressure  
No seizing  
High number of cycles

**4. Elastomer O-Ring with a hardness of 90 Shore A**

No deterioration with quick operations

**4. Low-permeability O-ring "Rapid Gas Decompression"**

Good resistance to explosive decompression

**5. Stem in 17-4 PH H900**

Increased mechanical strength about 5 times more compared to a standard 316 S.S.

**5. Shaft rolling**

Less wear of the seals due to the low roughness (0,4 micron Ra) which facilitate the sliding of the shaft

**6. Antistatic device (electrical continuity between ball, stem and body)**

Static electricity is avoided which can cause sparks and fire in an inflammable/explosive environment  
Contact safety throughout the entire life of the valve

**Fire safe design**

Guarantees the tightness of the valve also in case of fire

**Atex Certificate**

Installation is possible in a potential explosive environment

**UP to SIL 3 certified**

Guarantee of the high level of functional safety
