MAGNUM Split Wafer PN 63-100 ANSI 600 stainless steel ball valve

Macro [Ball valves](#)

Category [MAGNUM](#)

Subcategory [MAGNUM Split Wafer](#)

Family [MAGNUM Split Wafer PN 63-100 ANSI 600](#)

benefits

1. Antistatic device ((electrical continuity between ball, stem and body)

Static electricity is avoided which can cause sparks and fire in an inflammable/explosive environment

Contact safety throughout the entire life of the valve

2. Double antifriction washer

Less Breakaway Torque is granted

Less wear comparing with the execution with the single washer

3."V" seals pack; 3 seals + o-ring

It ensures a perfect tightness even after a high number of cycles

4. Spring washer on the shaft seal

Guarantee of the recovery of the gap due to the wear caused by the rotational movement of the shaft avoiding leakage towards the outside part.

Allow to maintain energized the "chevron" seals (V), thus avoiding any leakage to the outside, against huge temperature excursions

5. Stretch Graphite seal

Tightness towards outside is granted, independently by the thermal excursions to which the valve is subjected

Greater precision in the alignment of axes due to a unique positioning in the process machining from raw material to finished valve

Longer lifetime of the valve

Less breakaway torque

Valve body in carbon steel made with NACE certified material as standard

Greater corrosion resistance

Greater ductility of the material

100% in- house manufacturing process technology

Maximum control and accuracy in all the stages of the manufacturing process

Flexibility in supply quickly special executions requested by customers

"Fire safe" Certificate

Guarantees the tightness of the valve also in case of fire

ATEX Certificate

Installation is possible in a potential explosive environment

TA LUFT fugitive emission Certificate

High level of safety of the tightness towards the outside is granted

PED Certificate

Full compliance with European Safety Standards for Pressure Equipment

UP to SIL 3 certified

Guarantee of the high level of functional safety
