

Item 615-616 PVC ball valve

Macro [Ball valves](#)

Category [Other PVC ball valves](#)

2-way full-bore PVC ball valve, threaded or glued ends

ITEM 615

Connection: threaded

ITEM 616

Connection: to be glued

features

GENERAL FEATURES:

- Working temperature: from 0°C to 60°C
- Working pressure: see diagram
- Applications: chemical and all kinds of fluids compatible with PVC
- Connections:
 - Female threaded as per DIN/ISO 228/1;
 - to be glued ISO 727 UNI EN 1452
- PN 16 till 20°C if classified chemical resistant with the used fluid with glued ends, PN10 with threaded ends.

Kv is the coefficient, expressed in m³/h (with water at 15°C) causing a pressure loss of 1 bar.

Torque can vary depending on temperature and type of fluid; a safety factor of 1.4 must be applied. Torque can drop on high frequency of operations. The actuator/ valve sizing, indicated on the following pages, are based for valves to be used with liquids or gaseous fluids, clean, and for medium temperatures.
